Kurztext	S/4 HANA: Data Model Changes in SD
Komponente	SD-BF-MIG Werkzeuge für Migration

Langtext

Symptom

You are using a SAP ERP system and intend to perform the upgrade-like conversion to S/4 HANA.
The custom code check shows customer objects affected by simplifications.
SAP objects used by the customer objects have been changed in a syntactically incompatible way.
The custom code check refers to note 2198647 which covers data model changes in the area SD (Sales and Distribution).

Ursache und Voraussetzungen

This note contains detailed descriptions how to adopt customer objects to the data model changes in SD.

Lösung

The attached documents describe in detail how adoption has to be done for the following data model changes:

Elimination of status tables VBUK and VBUP
Change of the technical structure of document flow table VBFA
Field length extension of field VBTYP (SD document category) and elimination of field VBTYP_EXT.
Elimination of index tables for SD documents by Material and by Customer.
