Language	EN
Short Text	S/4 HANA: Data Model Changes in Pricing and Condition Techni
Component	SD-BF-PR Pricing and Conditions

Long Text

Symptom

You are using an SAP ERP system and intend to perform the upgrade-like conversion to S/4HANA. The custom code check shows those customer objects that are affected by simplifications. SAP objects used by the customer objects have been changed in a syntactically incompatible way. The custom code check refers to SAP Note 2220005, which covers data model changes in the Pricing and Condition Technique area.

Reason and Prerequisites

This note contains detailed descriptions about how to adopt customer objects to the data model changes in the Pricing and Condition Technique area.

Solution

The attached documents describe in detail how the adoption process for the data model changes in Pricing and Condition Technique must be performed.
